

# Developing an Accountability System

How would you design a national accountability system to demonstrate program effectiveness? Discuss the following questions and report out.

<p><b>How would I create measures that are objective across all states?</b></p>	
<p><b>How would I ensure valid and reliable data?</b></p>	
<p><b>How would I maintain state and local control and program flexibility to meet learner needs?</b></p>	
<p><b>How would I minimize burden?</b></p>
